We strongly condemn the instigation against the honorable Prime Minister Victor Orben, accusing him of tolerating and promoting individuals who were associated with the Nazi regime, therefore legitimizing and supporting the Nazi regime and their tragic history,

In our dealings with the prime minister and his government to help restore and maintain the cemeteries in Hungary that were desecrated by the Nazis during the second world war, he and his government have been outstanding in their commitment and help towards this and any other issue related to the orthodox Jewry ,

We are, and always be indebted to them for their continues help and cooperation, and look forward to continue this positive relationship,

Those leading the instigation do not represent us or any other group of the orthodox jews,

Sincerely,

Rabbi M. Hoffman
